From the age of 18 I have not too long ago been using Pheromone products, I've now just turned 40 and I have come to see these as my little remedy. I will be just an average looking guy yet I have was involved with some of the best looking women in the modern world and people have wondered, how does he or she practice it? Features it offers is pheromone products such as **Max Attraction** Gold or Pherazone mixed with subtle musk. Back in 1988 to look at first began using these items the pheromone used is pure androstenone, which is very powerful and not very subtle, nevertheless more recently new types of pheromones have been identified called social pheromones. These brand new pheromones blend interpersonal signals with sexual signals and also the result could be devastating!

Several years ago while i was doing a video review for Pherazone I hit the town with plenty still about and that night I had a lot of women hanging off me all night long, it was pretty much ridiculous. Now is this simply my magnetic charm and boyish good looks, properly put it this way, without pheromones nothing much happened, I say much as stuff did still take place but it was totally different from when I had pheromones on. Now had been this just psychological? Was I just more confident? The placebo effect? It's possible, but it can not explain everything. Only those who have tried the latest social pheromones will understand what I am saying here.
