- You are a woman you will know the reason why pheromone is used.
- Woman uses pheromone for drawing the attention of a man and for looking more attractive.
- But it is not very easy to find the best pheromones for women.
- Every woman is not the same as other women and all of them are not same in nature or other thing.
- So if a person kind pheromone is suitable for you there is no guarantee that it will also matches your friend or your sister.
- So you need to find pheromones which are more suitable for you.

Pheromones are chemicals released by a living organism to attract the opposite sex and it exists naturally in perfumes through the plant draw out from which the scent is made. You will find that some perfume pheromones are stronger then the others and thus, you may like a perfume on your partner better than the other, it is purely a matter of preference in smell.

DoctorGoodSkin.com is a webbased skin care guide where you can find a lot of information, articles and tips about skin diseases and conditions, skin treatments and procedures, skin care, skin care products, etc. You will also find information about hair and nails. ### Use Layering With Regard to Longlasting Scent

Many people have trouble holding a perfume on their skin for long periods of time and half way through an evening they need to refresh the scent. You can do so in two ways; either carry a handbag size perfume or utilize adding to hold down a scent. Layering is done by applying the scent lotion first on the human body as soon as you step out of the shower and then apply the perfume on the heart points; this will last you for at least eight hours. Also choose perfume and not eau de toilette because the former is more robust and therefore longer lasting. Enjoy the scent pheromones!
