

# Mate Magnet Cologne: Women Pheromones - How Men are Attracted to It

Women pheromones are given off by women when they are interested in another person and are often picked up on as a signal that they are offered. Women seem to be able to attract hordes of men without being particularly beautiful and even having a sparkling personality. Other females seem to be ignored, although they may be better looking and also have more interesting personalities. Researchers do not know what makes some women so irresistible and others not so much in demand, but think that it has something to do with women pheromones.

- The best pheromones to attract men and women are those who are undetectable on the conscious level.
- Although we are aware of the consequences of pheromones, we usually are not aware of them consciously.
- Concentrations of pheromones needs to be in the not too much, not too little category.

*Estriol is one of the three main estrogens made in the human body and is made in significant quantities when a women is pregnant.*

Pheromones certainly are a chemical reaction in the body that transmission excitement, fear or other strong emotions. You have probably heard the creatures could scent fear in people - this is correct. In case you are afraid of dogs, they will circle you since they have the nose to be able to detect the human pheromones that you are giving off indicating your concern. But humans do not have the same sense of smell as other animals. However, males do pick up on women scents all of the time. This is the reason why some men are drawn to some women and not others.

## Androstenone-is a Steroid that can be Found in Both Men and Women Sweat and Urine Glands

There are two different and also specific genotypes that can cause Androstenone to have a odor. One sort can identify the particular smell as an unpleasant exhausted smell which may be reminescent of urine. However the other type may describe to be rather pleasant like a flower. In a small amount, this pheromone is largely undiscovered in order to humans.

- Human being's olfactory prowess is not always on par with those of other animals, but we all are able to sense pheromones.
