

Gilroy Fragrance: The Law of Attraction

We tend to be, in general, all drawn, either sexually, physically or personally to another person or other persons. We don't know how, but there is something that triggers our desire when we see or meet a certain type of person. Without even knowing that individual, we know that they are "our type" and when we see this kind of an example of our type, we instantly realise the fact and we react to it by creating large amounts of pheromones.

- Having problems attracting a woman right into a one-night stand or into something much more serious?
- Other than good looks, nice clothes, and cool cars, there are also other ways on how to attract a mate.
- And that is with the power of smell.

Research Has Found that a Mother Influences Her Son's Expectations

She indicates exactly what she is looking for in a partner but she also influences her son on female features. So if she is a warm-hearted and friendly person, her son will believe that this is indicative for the female species. Those sons are likely to grow up to become warm and responsive lovers who will also be willing to take more responsibility in the household.

Apart from the stereotype celebrities, actors and actresses, models and beautiful people whom we secretly and sometimes quite openly adore and feel attracted to, we all have our "type", which includes body kind, body shape, hair colour, eyes and a whole lot of other physical attributes that trigger our desire. Personality is actually of course another important factor; do we go for the outgoing and confidence or the warm and friendly, or do we like the strong, quiet and intelligent type? We are all aware that for most women it is very important that a man can make them laugh. And it is sometimes another thing entirely that heavily influences somebody choice: money!

You can certainly boost your pheromone levels by purchasing products that contain human female pheromones. The human pheromone cologne is one of the most popular of the products although you can also buy human pheromones in the form of oil, a patch, or an electronic diffusion system.

Pheromone is a term generally noticed and used in the animal kingdom, particularly among insects. It is said to be a secreted or excreted chemical factor, either through scent or through other secreted chemicals, that triggers a specific social response in the other and of the same gender. One popular example of such social response is actually sex or procreation.

However, Believe It or Not, Pheromones are Also Present Among Human Beings

Many experts have said that those with high levels of pheromone can get by easily amongst the opposite sex. This is the reason why a man, though not gifted in looks and in style, can still get those one-night pleasures easily through odor alone.

Pheromones For Women Copulin based pheromones for women are said to be the answer to a girls quest to "nab her man." They are secreted by women naturally however, the copulins found in pheromone products are synthetic.

Genetically, men are programmed to prefer ample breast and broad curvy sides as this, in general, almost guarantees healthy offspring due to easy childbirth and sufficient nourishment. Women genetically prefer the broad shoulders for protection and the firm muscled buttocks for sexual longevity increasing the chance of impregnation.

To cut a long explanation short, simply because guys are observed more when they are on the prowl for female company it doesn't necessarily mean their opposite numbers aren't playing the same game.

- While pheromones for ladies are available in both fragrance and concentrate kind, the use of them mirrors the same rules as it does for the men.
- Use lightly and remember, more is not better.

Daughters are Influenced by the Very First Man Love in Their Lives, Their Fathers

The fathers' character often determines how women relate to the opposite sex. Fathers who are very supportive may raise daughters who are open and supportive themselves as their own fathers have ensured they always feel good about themselves. The opposite is true of women whose fathers were distant, cool and critical. They will do not have such high degree of self esteem and this is reflected in their relationships.

Spite of many years of the media's attempts to subdue the male preference for any curvy woman and also the creation of the skinny woman as the ideal body shape, in the two couple of years, curvy women are back onto the picture as well as inside fashion, the last stronghold of the hollow eyed "bag-o-bones" girl, designers are beginning to utilize more and more full figured women on their catwalks.

- Tests have indicated your testosterone levels can increase significantly if they get a sniff of copulins.
- In fact, levels can increase anywhere from 100-150% and more amazing, the reaction is almost instant.

Truth be told, drawing attraction from a potential partner is an extremely fulfilling feeling. A woman who cannot achieve this is bound to look down on herself, lose confidence, become an attention seeker, and eventually become even more unattractive. However, she can do something about this by tweaking her female pheromones i.e. chemical compounds which are produced by the human body and which dictate sex feelings and attract the opposite sex.

- Women are considered a much more attractive proposition in order to a man in the event that men get their dose of copulins through the nostrils.
- However, the question still needs to be asked...does a man really need to be tempted by a stimulant to be attracted to the opposite sex?

There's a stronger presence of pheromones for women and in the event that you think about human behavior for a moment, this just makes sense.

Equally, a mother with a depressive personality that exchanges friendliness with times of coldness and rejection may raise a son who is afraid of commitment and who in terms of finding the right woman, will always be looking at the grass on the other side of the fence.

Addition to that, the use of this formulation can also significantly increase a person's self-esteem. By easily attracting the opposite sex, or even dominating the same sex, can significantly boost a person's self-esteem, allowing them to perform their tasks, such as their jobs, with ease and with confidence.

Better that Perfumes However, Using Just Any Kind of Perfume is Not Enough

There has been a new formula available in the market which is said to help in attracting the opposite sex, making it easier for the men to get their one-night stands, while giving the women the power to send men on their knees. All of these effects by using pheromones attract women or men. Therefore what are pheromones?

- So what's available for the ladies?
- Exist pheromones for women on the market?
- Sure there tend to be.
- It just seems that they don't get the prominence in the advertising stakes as the male product.

The Mating Game

In the process of searching for a mate, men are more aggressive and you could be forgiven that the art of goal revolves mainly around men looking for a female partner. Hence the marketing of pheromone products has been directed at a mans market.

On the other hand, women are considered a little more subtle within their pursuit of relationships with the opposite sex but in a sense, are they less aggressive? Where am I going with this?
