My other gentlemen, I'm going to share with you a really effective method on steps to make ladies like you nearly all time and without needing a lot of energy on your part!

Understanding the teenage brain is both a right and a obligation to the ones that are parenting teens. We have the data and the research to learn the difference between promoting healthy levels of teenage brain fuel through things like fun, eye contact and encouraging words, versus allowing harmful and addictive patterns through sexual overstimulation. We wouldn't enable our teenager to feed a desire to drive the Autobahn at 12-years-old. That degree of experience requires the appropriate maturity and intelligence, let alone time and place. What is your teenager engaged in that is fueling his or her thought pattern toward a craving for sexual activity? Maybe high-octane is not the best choice.

## Parenting Teens: a Closer Inspection At the Teenage Brain

When teenage brain chemicals are released, it is a force as powerful as a Hemi engine. Trying to stop the thought process with a parenting teens lecture when Oxytocin is being released is like trying to stop the momentum of an Indy car on lap 19 without taking your foot off the gas. The challenge is that the addictive nature and thrill starts a long time before your own teen steps onto the track. It starts with a thought - a seemingly harmless suggestion in the form of a picture, movie, or even word picture that revs up the engines.

## The Chemical Launch in the Teenage Brain is a Trained Activity

Repetition: over and over again, until the teenage brain is about automatic release of Oxytocin and other mind-altering chemicals. Don't get me wrong, these kinds of hormones and chemicals in the teenage brain are usually healthy and normal when released in the proper dosage at appropriate times. It really is like the difference between taking a turn at 50 mph or 65 - the later could lead to disaster.
